Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 21 and 22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "dependent from above" is not clear.
3. Claims 21 and 22 recites the limitation "the jack". There is insufficient antecedent basis for this limitation in the claim. The applicant is behooved to review all of the claims for such lack of antecedent informalities.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 21 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable
Dodds and Kimble.

Dodds et al discloses the use of a grand piano(column 4, lines 5-10)with a jack (26), a spring (38), and a friction reducer(39).

Dodds does not disclose the use of a knuckle.

Kimble discloses the use of a grand piano where friction is eliminated at the knuckle (column 3, lines 10-15).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the piano as disclosed by Dodds to include the knuckle as disclosed by Kimble in order to provide an element that is driven toward a string.

6. Claims 1-20 and 23-37.
